

Why do you need to protect your business with Synoptek DraaS?

1 In 2009, Over 50 percent of businesses experienced an unforeseen interruption, and the vast majority (81%) of these interruptions caused the business to be closed one or more days

2 Every week 140,000 hard drives crash in the United States.

3 80 percent of businesses suffering a major disaster go out of business in three years, while 40 percent of businesses that experience a critical IT failure go out of business within one year. In the case of suffering a fire, 44 percent of enterprises fail to reopen and 33 percent of these failed to survive beyond 3 years.

4 Companies that aren't able to resume operations within ten days (of a disaster hit) are not likely to survive.

5 Too busy or lack of knowledge is preventing small businesses from putting disaster recovery plans in place. Analysts from Hughes Marketing Group have found that over the course of a month, 90 percent of small companies (fewer than 100 employees) spend less than 8 hours planning or managing their business continuity plans.

6 34% of companies fail to test their tape backups, and of those that do, 77% have found tape backup failures.

7 Disaster recovery vendors have stated that between 60 and 70 percent of all problems that disrupt business are due to internal malfunctions of hardware or software, or human errors that may lead to fraud.

8 Malware and Virus activity are on the rise. In 2008, the United States was the top country for overall malicious activity, making up 23 percent of the total.

9 93% of companies that lost their data center for 10 days or more due to a disaster filed for bankruptcy within one year of the disaster. 50% of businesses that found themselves without data management for this same time period filed for bankruptcy immediately.

10 31% of PC users have lost all of their files due to events beyond their control.
